ABOUT US

Our Mission:

“Innovating and bringing the future of electric based technologies to the world, with consistent advancement in the realms of quality and perfection”

About us:

At Lyter, we are on a constant mission to bring our customers the best in electric based technologies, and we do that with passion and constant innovation while keeping quality and simplicity at the core of user experience. From simple home based electric solutions to innovative world class technologies we are pushing the boundaries in the realms of electric technology manufacturing, innovation and customer experience to the next level. This is made possible by our world class manufacturing practices, innovation leadership, and dynamic control of our supply chain networks. We are proud to introduce to the world a new breed of electric solutions. We are confident and certain that our products will connect your world with the future of electric technology and user experience.

Our Vision:

To be the world reference in electrical and electronic based solutions.

FLUSH MOUNTING PLASTIC GANG BOXES

Concealed boxes are simple enclosures used to create mounting support and enclose wiring system. These are different from surface boxes in their application: they are concealed inside a wall. Their function is to protect the enclosed wiring from moisture, heat, corrosion etc. and to give them a long service life.

SURFACE MOUNTING PLASTIC GANG BOXES (For Modular Plate)

Surface Mounting Plastic Gang Boxes (For Modular Plate) are durable enclosures designed to securely house electrical switches, sockets, and other modular components in surface-mounted installations. Made from high-quality, flame-retardant plastic, these boxes provide excellent insulation and safety. Ideal for use in residential, commercial and industrial settings. They allow for quick and clean installations where concealed wiring is not feasible. The gang boxes are compatible with standard modular plates, ensuring seamless integration with modern electrical fittings. Their sturdy design and ease of mounting make them a reliable choice for electrical wiring applications.

FLUSH MOUNTING METAL GANG BOXES (GALVANISED - GI) FLOWER MODEL

The Galvanised Mounting Flower Project Model Boxes are specially designed and made by alloy of various metals of steel to prevent it from rusting; thus making the boxes a long life while being concealed inside the wall.

HEAVY DUTY FLUSH MOUNTING METAL GANG BOXES (40mm Deep 1.2mm 18 Gauge - Project Model)

Heavy Duty Mounting Metal Gang Boxes are engineered for robust performance in demanding electrical installations. Designed with a depth of 40mm and constructed from 1.2mm thick 18-gauge metal, these gang boxes ensure maximum durability and safety. Ideal for commercial, industrial, and high-traffic environments, the Project Model offers a reliable and secure housing for switches, sockets and other electrical fittings. Its flush-mounting design provides a neat and professional finish, making it the preferred choice for quality-focused projects that demand strength and long-lasting performance.

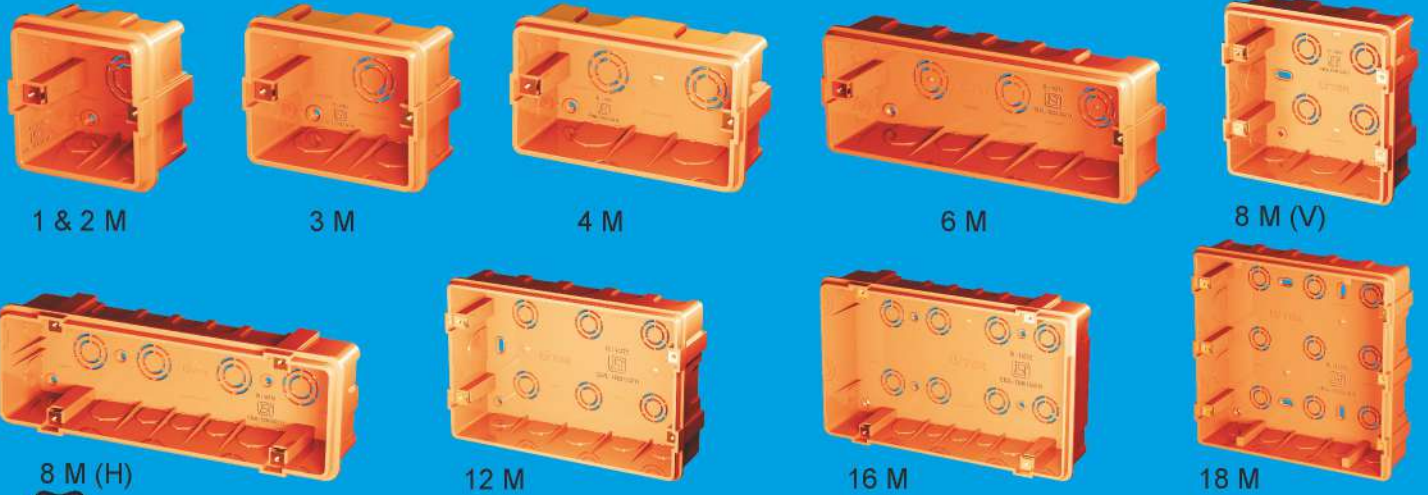

FLUSH MOUNTING METAL GANG BOXES (GALVANISED - GI) SKIN PASS FINISH

The Galvanised Mounting Skin Pass Finish Boxes are specially designed and pressed by applying protective zinc coating on steel with a smooth finish to prevent it from rusting; resulting the boxes to stay corrosion free application to give it an extended life.

FLUSH MOUNTING METAL GANG BOXES (STAINLESS STEEL - SS)

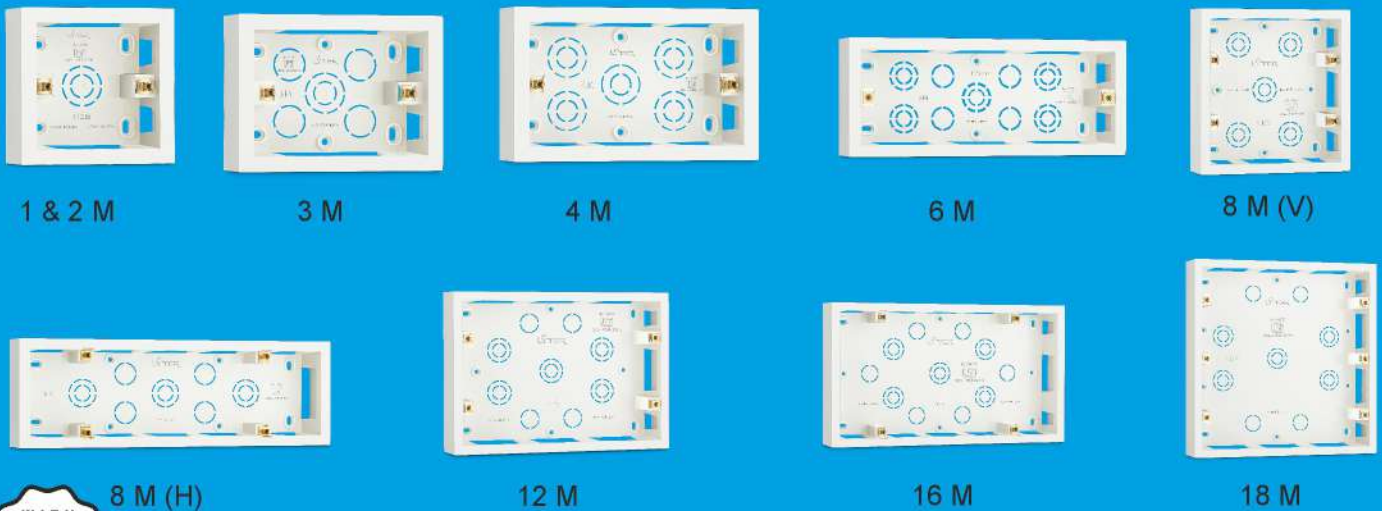

The Stainless Steel Mounting boxes are an alloy of iron that is resistant to rusting and corrosion; it contains elements such as carbon, chromium, other non metals and metals to obtain the desired properties to keep away moisture and heat. Hence, giving it more Shine, long & durable life.
